## POWDER COAT

- Aluminum fixtures are machined from solid billet stock.
- Solid billet material offers superior corrosion resistance and strength compared to cast parts.
- Aluminum is aerospace grade 6061-T6 offering excellent resistance to corrosion.
- Aluminum components are sealed with a conversion coating before exterior grade powder coat is applied.

**BR**  
Brass

## BRASS & COPPER

- All brass and copper fixtures are constructed from solid bar material and designed to last a lifetime.
- Brass and copper fixtures are shipped with no coating and will develop a natural patina finish over time.
- For those that can't wait for Mother Nature we offer a pre-applied patina finish.
- A Clear Coat is available to protect against brass and copper fixtures developing a natural patina finish.

**CP**  
Copper

**CC**  
Clear Coat

**NP**  
Nickel Plate

## NICKEL PLATE

- LED fixtures require good heat transfer.
- Stainless Steel is a poor conductor of heat.
- Nickel plating provides a similar appearance while providing superior heat transfer and corrosion protection.

# Accessories

## GROUND MOUNT

- Mounting cap and heavy wall 1 1/2" post.
- Post provides protection and space for secure connections.
- Mounting cap available in aluminum and brass.

## RISERS

- Extension risers.
- 1/2 NPS thread mounting.
- Available in aluminum, brass and copper.
- Select from 6, 12, 18 inch standard lengths.
- Please consult with factory for custom length.

## SURFACE MOUNT

- 2 1/2" Canopy mounting base.
- Use to surface mount fixtures.
- 1/2 NPS Female thread.
- Available in aluminum and brass.

## JUNCTION BOX

- Aluminum die-cast electrical box.
- Provides weather protection of electrical connections.
- Available in square and round.
